

AKIRA CHOW

SOFTWARE ENGINEER

📍 The Hague, Netherlands

ABOUT ME

Hi! My name is Akira Chow and I enjoy creating mobile apps. My interest in mobile development started back in 2017 after I followed a mobile development course in university. After lots of trial and error I finally got the gist of it and ever since then I was hooked!

EDUCATION

► BSc Computer Science

2013 - 2019

The Hague University of Applied Sciences

SKILLS

Programming Languages

JavaScript (ES6), TypeScript, HTML, CSS/Sass, Swift, native iOS

Libraries & Frameworks

jQuery, React, React Native, Next.js, Ionic

Tools & Platforms

Git, XCode, Webpack, Vercel, Firebase, Docker

WORK EXPERIENCE

► Software Engineer @ CAE

April 2021 - Present // Zoetermeer, Netherlands

- Write performant, robust, maintainable code for mobile apps
- Work with a variety of different languages, platforms, frameworks, and content management systems such as JavaScript, TypeScript, React Native, Ionic Angular, and Swift (iOS native)
- Collaborate with multinational teams of engineers, designers, and product owners on a daily basis

► Software Engineer @ RB Group.aero

July 2019 - April 2021 // Zoetermeer, Netherlands

- Research suitable hybrid mobile application development frameworks for a new mobile app
- Worked with a team of four engineers to build a new mobile app for pilots using React Native

► Junior Developer @ Inwijs

June 2017 - November 2017 // Leiden, Netherlands

- Build mobile apps using Ionic Angular and PHP Symfony as backend
- Write robust test cases for the backend system

► Intern @ DeDecaan

June 2017 - November 2017 // Leiden, Netherlands

- Rebuild and modernize parts of an existing website
